

ANTONIO ENRIQUE MONSERRAT

BS Computer Science Graduate

ABOUT ME

Computer Science student majoring in Software Technology at De La Salle University with experience building practical and user-focused applications through academic and personal projects. Interested in software engineering and problem-solving through hands-on development.

EDUCATION

Bachelor of Science in Computer Science

De La Salle University
2021 – 2026

SKILLS

Languages: JavaScript, Python, C#, C, C++, SQL

Frontend: React, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Tools: Git, GitHub, Unity, SQLite

Concepts: OOP, CRUD, REST APIs

Soft Skills: Problem Solving, Team Collaboration

LANGUAGE

- English
- Filipino

+63 927 664 6821

EXPERIENCE

IT Technical Support Intern

2020 – 2023

VRXE Philippines | Quezon City, Philippines

- Assisted in VR software testing and troubleshooting for company events and demos, supported the deployment and setup of VR hardware and applications, evaluated software solutions based on operational and client requirements, and participated in technical coordination and project planning activities.

INVOLVEMENT

- **Member**, La Salle Computer Society, De La Salle University (October 2023–October 2024)
- **Member**, Google Developer Student Clubs, De La Salle University (October 2023–October 2024)
- **Member/Researcher**, Human-X Interaction Lab (HXIL), De La Salle University (October 2023–Present)

CERTIFICATIONS

Agile Testing Certification

QE 360

October 2025

DRUMXROLL: EXPLORING XR PIANO ROLL IN TEACHING DRUM IMPROVISATION

Thesis Project | Unity, C#, Meta Quest | 2024–2026

- Developed an XR-based drumming training system designed to support drum improvisation learning through piano-roll visualization, immersive interaction, and guided practice mechanics.
- Built the application using Unity and C# while implementing real-time visual feedback, timing systems, and interactive learning workflows.
- Conducted usability and cognitive workload evaluations to compare XR visualization approaches and analyze user learning experiences.

HOUSEHOLD POVERTY STATUS CLASSIFICATION IN NCR USING FIES 2012

Machine Learning Academic Project | Python, Scikit-learn, Jupyter Notebook

- Developed machine learning models using PSA FIES 2012 data to classify household poverty status within NCR.
- Performed data preprocessing, exploratory data analysis, feature engineering, model training, and performance evaluation.
- Evaluated Logistic Regression, KNN, and Neural Network classifiers using classification metrics and data visualizations.

BENEFICIARY RECORD MANAGEMENT SYSTEM

Web Development Academic Project | HTML, CSS, JavaScript, SQL

- Developed a responsive web-based beneficiary management platform to improve organization and accessibility of beneficiary records.
- Implemented CRUD operations, authentication workflows, and user-friendly interfaces for efficient data management.
- Focused on usability, responsive frontend development, and structured record handling workflows.

DISTRIBUTED DATA WAREHOUSE REPORTING WITH OLAP

Database Systems Academic Project | SQL, Node.js, OLAP

- Built a distributed data warehouse system across multiple database servers to support analytical reporting and large-scale data processing.
- Developed backend processes for querying, aggregation, and report generation using OLAP-based workflows.
- Designed database structures optimized for scalability, analytical performance, and efficient data retrieval.

DISTRIBUTED OCR SYSTEM

Distributed Systems Academic Project | C++, TCP Socket Programming, Tesseract OCR, Qt

- Built a distributed client-server OCR application using raw TCP socket programming for remote image-based text recognition.
- Developed a Qt-based client interface for image uploads and implemented server-side OCR processing using Tesseract OCR.
- Designed the system to demonstrate distributed workload handling, concurrent request processing, and network communication.
